WORKPLACE SAFETY SERIES: AGRICULTURE

THE SITUATION

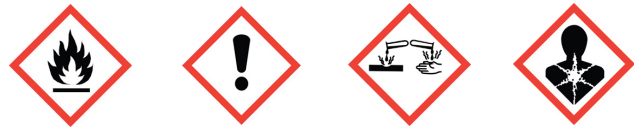

Toxic agents and chemicals used in the agriculture field can cause irritation and harsh injury to the eyes skin and body of workers. It's vital to have reliable emergency equipment installed or available to not only be compliant with codes and standards, but also to provide aid for your employees in the event of an emergency.

Potential hazards:

- Pesticides
- Diesel
- Gasoline
- Particulate

SYMBOL IDENTIFIER

These symbols indicate the need for emergency equipment.

LAWS AND STANDARDS

OSHA 1910.151(c):

Where the eyes or body of any person may be exposed to injurious corrosive materials, suitable facilities for quick, drenching or flushing of the eyes and body shall be provided within the work area for immediate emergency use.

ANSI/ISEA Z358.1:

Emergency showers and eyewashes shall be located within 10 seconds' travel time of hazard.

THE SPEAKMAN SOLUTION

For nearly 80 years, Speakman has designed and engineered high-performing, high-quality emergency equipment. With many unique areas within an agriculture facility that require specific types of equipment, Speakman offers several styles of showers and eyewashes that safely rinse in the event of an emergency. Explore our safety solutions ideal for agricultural processing applications.

A. SE-1200: Equipped with our SE-1000, this emergency combination is the undisputed solution in the event of an emergency.

B. SE-4300: With a 20-gallon tank, the SE-4300 portable eyewash delivers sprays for more than 15 minutes without being connected to a water source.

C. SE-4400: With a nine-gallon tank and dual spray heads, this includes an intuitive, pull-down activation.

D. SE-590: This 10-gallon, stainless steel, pressurized, portable eyewash station provides portability for use in mobile or transient applications. Includes a reinforced 6' drench hose for spot washing.
