

EMERGENCY EQUIPMENT DESIGNED SPECIFICALLY FOR CONSTRUCTION SITES

Every construction site is different, presenting unique challenges from job to job. And regardless of circumstance, ANSI/ISEA Z358.1 requires that a dedicated eyewash must be installed within 10 seconds' travel time of a hazardous location, which seems impossible without a plumbing supply located within proximity.

That's not the case with GravityFlo. Speakman's line of GravityFlo eyewashes features unique, portable designs that can be placed practically anywhere at your worksite. Plus, each fixture harnesses the power of gravity to deliver comfortable, effective relief for 10 continuous minutes without being connected to a plumbing supply.

FEATURED EQUIPMENT

GRAVITYFLO SE-4300

Features a 20-gallon capacity tank, dual spray heads and an included drench hose for precise flushing. ANSI/ISEA Z358.1-compliant.

GRAVITYFLO SE-4400

Features a nine-gallon capacity tank and dual spray heads with an intuitive, pull-down activation. ANSI/ISEA Z358.1-compliant.

10-GALLON PORTABLE EYEWASH WITH DRENCH HOSE SE-590

Features dual spray outlets with flip-top dust covers and pressure gauge. The unit is activated by a stainless steel push handle. Also includes a 6' reinforced drench hose for additional spot body washing. ANSI/ISEA Z358.1-compliant.

10-GALLON PORTABLE EYEWASH SE-591

Features a 10-gallon stainless steel pressurized tank with stainless steel push handle activator. Universal emergency sign included. ANSI/ISEA Z358.1-compliant.
